

The Tech Festival Canada

26-27 Oct 2026

Meet | Build | Scale

The Westin Harbour Castle, Toronto
1 Harbour Square, Toronto M5J 1A6 Canada

www.thetechfestival.com

PURPOSE & POSITIONING

The **Tech Festival Canada** is the country's deal-making platform where innovators, buyers, investors, and policymakers meet to turn emerging tech into real partnerships, pilots, and contracts. Expect senior decision-makers from enterprise and critical sectors alongside government bodies, associations, media, and leading research institutions creating the right room for announcements, procurement conversations, and collaborations that move faster than "business as usual."

For Partners, it's a high-intent audience built for outcomes: qualified buyer meetings, brand visibility with leaders who influence budgets and policy, and a direct path to partnerships and revenue. For attendees, it delivers sharp, practical content plus curated networking across industry, government, and research, so you leave with new relationships, real opportunities, and a clear view of what's next for Canada's tech economy.

Chief Strategy and Digital Officer
Marsh Captive Solutions

Amy Flood

Executive Director
Women's Health Collective Canada

Ashley Casovan

Managing Director
AI Governance Center, IAPP

Francois Guay

Founder & CEO
Canadian Cybersecurity Network

EVENT FOCUS

The **Tech Festival Canada** is structured around **five** future-critical focus areas, AI, Quantum Computing, Sustainability & Climate Tech, Cybersecurity & Digital Trust, and Robotics & Intelligent Infrastructure, each applied to the **five** sectors where budgets, procurement, and partnerships move fastest: Energy & Utilities, Healthcare & Life Sciences, Defence & National Security, Financial Services & Insurance, and Supply Chain/Manufacturing/Critical Infrastructure. This creates a practical “use-case first” program design: every conversation maps to a real industry problem and a path to pilots, contracts, and scale.

For sponsors and exhibitors, the matrix ensures qualified, outcome-driven visitor intent—buyers and influencers come to solve specific sector challenges (not just browse). For delegates, it guarantees high-signal networking across complementary stakeholders (industry, government, academia, media) around shared priorities like security, resilience, productivity, and commercialization. For government bodies, associations, and academia, it provides a clear platform to accelerate policy-to-procurement, standards, talent pipelines, research partnerships, and commercialization, with cross-sector alignment that turns innovation into measurable economic impact.

Tech Pillars

Artificial Intelligence (A.I.)

Quantum Computing

Sustainability & Climate Tech

Cybersecurity & Digital Trust

Robotics & Intelligent Infrastructure

Applied Sectors

Energy & Utilities

Defence & National Security

Healthcare & Life Sciences

Financial Services & Insurance

Supply Chain manufacturing & Critical Infrastructure
